

Records & Document Management State Agency Student Records

Who we are:

Law & Forensics solves the complex legal issues at the convergence of technology and the law. Our team includes some of the foremost thought leaders in E-Discovery and electronic forensics as well as the pioneers in the latest techniques in cyber security. It is this expertise which allows us to solve information governance problems efficiently and cost effectively.

What we do:

We work with clients, whether law firms, corporate organizations or government agencies, to resolve E-Discovery issues, perform electronic forensic examinations and investigations, and help bridge information and communication gaps between technologists and legal professionals.

Where we are:

Atlanta	Century City
Chicago	Delaware
Los Angeles	New Jersey
New York	Seattle

After student records from a state agency were exposed on the internet, one of Law & Forensics's consultants was called on by a government official to design and implement a more secure infrastructure to use agency-wide.

After analyzing current records management, conducting a needs assessment and identifying vendor solutions, Law & Forensics's consultant redesigned agency's infrastructure within 30 days and implemented a functional security infrastructure within 90. Law & Forensics's consultant also advised executive senior management on how best to direct funds per employee in order to safeguard data from internal and external threats.

Finally, Law & Forensics's consultant created in-house training programs for staff to ensure that all employees were utilizing new infrastructure technology correctly and were aware of data security protocols. Due to the consultant's work with the agency, it was deemed the "most secure Government Agency" in the state.
