E-Discovery Education and Training

Law & Forensics' team offers comprehensive webinars, online courses, and in-person training for the bench and bar on various topics, including: predictive coding, latest case law, e-discovery technologies, and international e-discovery.

Our instructors are seasoned lawyers and technologists and our expertise in these areas enables us to deliver compelling and informative instruction. L&F's unique methodology of teaching lawyers the technology and the law ensures that the classes deliver the requisite legal and technical hands-on training necessary for lawyers to be skilled at e-discovery. We have trained over 5,000 members of the bench, bar, and law enforcement, as well as the Secret Service, government officials, and CEOs.

COLLABORATIVE PROGRAM DESIGN
Provide a custom built teaching program

Collaborate with clients to design programs that focus on providing our clients a curriculum that is suited to their organization. L&F creates custom programs that bridge the gap between technologists and lawyers, allowing them to identify appropriate legal or technical issues and suitable resources.

CORPORATE SIMULATION TRAINING
Educate at the technical and legal levels

Simulate an interactive data breach attack alongside executives from the information security, incident response, business, legal, compliance, and human resource divisions of an organization. The simulation allows an organization to gauge and improve its effectiveness in crisis response, explore best practices, and identify potential consequences for the impacted business enterprise. It also allows executive teams, corporate counsel, boards of directors, and information professionals to improve their ability to respond to a cyber attack.

HANDS-ON IMMERSION
Create functional strategies

Offer intensive immersion training designed to assist a company and its legal, business, and technical staff to master the practical steps necessary for defending systems and networks against the most dangerous threats – the ones being actively exploited. Provide a step-by-step "how to" training that enables individuals to perform their job with a higher degree of efficiency and success. Offer training in a classroom setting from certified instructors or in mentored settings in cities around the world.

Case Studies

LOS ANGELES PROSECUTORS OFFICE

Problem: Lack of technical knowledge in client matters.

Solution: Conducted comprehensive e-discovery training for Los Angeles prosecutors. Designed a program that covered basic concepts in technology as well as more advanced concepts related to e-discovery analysis and presentation.

EUROPEAN PHARMACEUTICAL COMPANY

Problem: Lack of knowledge on e-discovery processes.

Solution: Worked with a pharmaceutical company to educate senior management on issues related to the e-discovery process such as document retention and strategies for working with ESI consultants.

MANUFACTURING COMPANY

Problem: Lack of institutional e-discovery training.

Solution: Conducted comprehensive e-discovery training for a global manufacturing company with more than 50 subsidiary companies. L&F created an e-discovery training program that introduced the in-house legal, business, and technical stakeholders to e-discovery and their respective obligations.

About Law & Forensics

Law & Forensics is a strategic consulting firm with a global presence that assists clients with sensitive and complex electronic discovery, information governance, computer forensic, information security, and privacy issues. With a strong record for getting results, reducing costs, mitigating legal risks, and delivering value, Law & Forensics provides corporations, government agencies, law firms and other legal, business, and technology stakeholders with solutions to address complex litigations, sensitive investigations, and regulatory inquiries.

Law & Forensics team members act as testifying expert witnesses, discovery referees, forensic neutrals, Special Masters, and electronic discovery consultants both in the U.S. and abroad, having worked on hundreds of matters.

All of Law & Forensics' work reflects the highest ethical standards, no matter the scope of the task at hand. We consistently find new ways to serve our clients, and justice, better.
