Law & Forensics’ consultants are leaders in providing cloud computing computer forensics. We help law firms and companies run successful investigations and return to normal operations after they have been breached.

Cloud computing based forensics may be new to mainstream media, but it's old news to us. Our experienced team leads the industry in securing data in the cloud and responding to breaches. We deliver critical guidance on how to respond to and manage forensic and data breach issues specific to the cloud.

**Cloud Forensics and Social Media**
Consulted, testified, and advised in 1000+ disputes

**Expert Witness**
Patent, Copyright, and Trademark Disputes, Theft of Trade Secrets, Class Actions, Embezzlement, Contract and Business Disputes, Regulatory Actions, Cyber Stalking, Malpractice Dispute

**Incident Response**
Red Team is available at a moment’s notice

**Forensic Investigations**
Thousands of investigations all over the world

Locate and recover deleted or partially disrupted files in private and public cloud computing environments using off-the-shelf and patent pending cutting edge software. Analyze social network platforms, establish authenticity of social media, and translate technical findings into digestible information for lawyers.

Assist the court in understanding the technology relevant to a case and make recommendations regarding forensic issues specific to the dispute, especially where voluminous materials need to be reviewed or inspections outside of court facilities are necessary.

Investigate and respond to a data breach within hours of being retained. Use cutting edge systems and investigative technologies to quickly identify and remediate the source of the data breach. Analyze network packets, malware activity, RAM memory, video, and tapes at our labs.

Assist companies in finding relevant data by collecting and harvesting data in a wide range of media, including mobile devices, hard drives, and backup tapes (e.g., deleted, hidden, lost, or encrypted files), and preserving data in a forensically sound fashion (e.g., locked, fireproof safe for evidentiary).
Case Studies

**CLOUD HOSTING PROVIDER**

**Problem:** Client was compromised by malicious cyber attacker.

**Solution:** L&F recovered more than a dozen servers belonging to the company that were taken off-line by a malicious cyber attacker in less than 48 hours. After L&F cleaned and recovered the data from the servers, it identified the source of the breach and remediated the problem.

**AEROSPACE & DEFENSE COMPANY**

**Problem:** CEO was breached.

**Solution:** Retained by an aerospace team to remediate a breach of their private cloud. An L&F team member was onsite at the data center located in the Middle East within 24 hours of the cyber incident. L&F identified the breach in the private cloud, and spearheaded the remediation efforts, including cleaning and recovering dozens of servers that hosted critical and essential data in the company’s private cloud.

**GLOBAL HEALTH & BEAUTY PRODUCT**

**Problem:** Client was unable to recover deleted files.

**Solution:** Hired by a global health and beauty products company to recover hundreds of files deleted from a Dropbox account by a disgruntled employee. L&F also identified several backdoors that the employee had left that, if not deleted, could have resulted in breach costing more than fifty million dollars.
