Law & Forensics' team has conducted thousands of complex forensic investigations on all types of devices. We are able to collect, preserve, and harvest data from laptops, servers, mobile devices, hard drives, and backup tapes in a wide range of formats and media. L&F’s reputation for neutrality and technical excellence has been a significant factor in our selection as the digital forensic neutral in dozens of high profile cases, such as the class action against UMC Hospital in the District Court of Las Vegas Nevada.

**Investigations**
Thousands of investigations all over the world

**Detection of Spoliation**
Discover evidence of spoliation in dozens of disputes and submit expert reports used by the parties

**Expert Witness**
Patent, Copyright, and Trademark Disputes, Theft of Trade Secrets, Class Actions, Contract and Business Disputes, Regulatory Actions, Cyber Stalking, Malpractice Dispute

**Forensic Data Recovery**
Utilize patent pending hardware and software

**Cloud Forensics and Social Media**
Consulted, testified, and advised in 1000+ disputes

Locate relevant data by collecting, preserving, and harvesting data from mobile devices, hard drives, and backup tapes (e.g. deleted, hidden, lost or encrypted files) in a wide range of formats and media, and preserving data in a forensically sound fashion (e.g. locked, fireproof safe for evidentiary).

Analyze devices and accounts to determine who created what data, if any data was deleted, and if specific aspects of data were modified. Recover other necessary details surrounding modified or destroyed data or accounts.

Assist the court in understanding the technology relevant to a case and make recommendations regarding forensic issues specific to the dispute, especially where voluminous materials need to be reviewed or inspections outside of court facilities are necessary.

Recover encrypted documents, hard drives, compressed files, and storage containers lost during an incident. Utilize patent pending hardware and software to recover data deleted by an employee or by a rare data-wiping virus, which can make a machine unable to operate. Our data recovery tools can repair partition or file structure, inspect the damaged file structure, and attempt to pull files out.

Locate and recover deleted or partially disrupted files in private and public cloud computing environments using off-the-shelf and patent pending cutting edge software. Analyze social network platforms, establish authenticity of social media, and translate technical findings into digestible information for lawyers.
Case Studies

**PHARMACEUTICAL COMPANY**

Problem: Internal fraud investigation.
Solution: Retained as an expert in a large consolidated products liability case. Found that certain employees had not adequately preserved and had even destroyed key evidence in the case. Produced a report that parties used to compel a favorable settlement.

**NON-PROFIT COMPANY**

Problem: Employee embezzlement.
Solution: Retained to investigate $2 million embezzlement. Using predictive coding to mine the data, L&F experts forensically analyzed the banking app on a mobile device to prove fraud. The L&F team wrote an expert witness report clearly explaining their findings. The client won the case, recovering all lost money.

**AEROSPACE & DEFENSE COMPANY**

Problem: CEO was breached.
Solution: Retained by an aerospace team to remediate a breach of their private cloud. An L&F team member was onsite at the data center located in the Middle East within 24 hours of the cyber incident. L&F identified the breach in the private cloud, and spearheaded the remediation efforts that included cleaning and recovering dozens of servers that hosted critical and essential data in the company’s private cloud.

About Law & Forensics

Law & Forensics is a strategic consulting firm with a global presence that assists clients with sensitive and complex electronic discovery, information governance, computer forensic, information security, and privacy issues. With a strong record for getting results, reducing costs, mitigating legal risks, and delivering value, Law & Forensics provides corporations, government agencies, law firms and other legal, business, and technology stakeholders with solutions to address complex litigations, sensitive investigations, and regulatory inquiries.

Law & Forensics team members act as testifying expert witnesses, discovery referees, forensic neutrals, Special Masters, and electronic discovery consultants both in the U.S. and abroad, having worked on hundreds of matters.

*All of Law & Forensics’ work reflects the highest ethical standards, no matter the scope of the task at hand. We consistently find new ways to serve our clients, and justice, better.*
